Singular Manual

A Computer Algebra System for Polynomial Computations

HTML User Manual for Singular Version 4-0-3, 2016

<u>University of Kaiserslautern</u> <u>Department of Mathematics</u> <u>Centre for Computer Algebra</u>

- 1. Preface
- 2. Introduction
- 3. General concepts
- 4. Data types
- 5. Functions and system variables
- 6. Tricks and pitfalls
- 7. Non-commutative subsystem
- A. Examples
- B. Polynomial data
- C. Mathematical background
- D. SINGULAR libraries
- E. Release Notes
- F. Index

Table of Contents
About this document

User manual for <u>Singular</u> version 4-0-3, 2016, generated by texi2html.
